

Kenenisa Beyan

Fullstack Developer | Next.js | React.js

✉ kenenisab05@gmail.com 📍 [Adama, Ethiopia](#) 🔗 [LinkedIn:keno05](#) 📄 [GitHub:kenenisabeyan](#)

EDUCATION

Adama Science and Technology University

Adama, Ethiopia

Bachelor of Science in Computer Science and Engineering

Expected Graduation, June 2027

- **Concentrations:** Software Engineering, Web Development, Database Systems, and Computer Networks
- **Related Coursework:** Web Technologies, Software Engineering Principles, Computing in Python, Object-Oriented Programming, Data Structures & Algorithms, Operating Systems, Database Management, Computer Networks

EXPERIENCE

Fullstack Web Developer

- Built and deployed custom full-stack applications (React, Next.js, Node.js, PostgreSQL, Supabase) tailored to client needs, ensuring clean architecture and responsive design.
- Improved client project delivery efficiency by **30%** through creating **reusable components and scalable backend APIs**, enabling faster iteration and reduced development time.

PROJECTS

e-Tutor – Online Education Platform (Frontend) [Live Demo](#) ↗ [Github](#).

- Developed a scalable and responsive frontend interface for an online education platform similar to Udemy.
- Designed reusable components, intuitive navigation, and a clean user experience using React.js, focusing on real-world application structure and future backend integration.

Student-Grade-Management-App [Live Demo](#) ↗ [Github](#) 📄.

- Designed and developed the frontend of a **university-style student grade management system** inspired by real academic platforms.
- Implemented **dynamic grade calculations** and **interactive tables** using JavaScript.
- Added **persistent data handling** with maintainable UI logic to support realistic academic workflows.

Mock Interview AI – Prepwise [Live Demo](#) ↗ [Github](#) 📄.

- Built using Next.js, Firebase, Tailwind CSS, and Vapi voice agents.
- Delivers AI-powered mock interviews with real-time, voice-based interaction.
- Includes secure authentication, persistent data storage, and a modern UI for interview preparation.

Employee-Performance-Evaluation -Dashboard [Live Demo](#) ↗ [Github](#) 📄.

- Designed and implemented a **scalable full-stack performance evaluation system** using **Next.js (App Router)** and **MongoDB**.
- Enabled **admin, self, and peer evaluations** with secure authentication, role-based dashboards, and **performance data visualization** to improve transparency and tracking.

Quill [Live Demo](#) ↗ [Github](#) 📄.

- Built a modern ****digital journaling web interface**** using HTML and CSS.
- Designed responsive layouts with clear navigation, feature sections, and call-to-action components.
- Focused on clean UI, typography, and realistic product-style design.

Country Quiz [Live Demo](#) ↗ [Github](#) 📄.

- Interactive quiz app using **REST Countries API** and **React**.
- Features: dynamic question generation, multiple-choice, instant feedback, result tracking, and replay option.

Anti-Plagiarism Detection System (SRS & Requirements Gathering)

- Academic project at **ASTU**.
- Led requirement gathering and authored a **Software Requirements Specification (SRS)** document for a plagiarism detection system.
- Focused on system design, functional/non-functional requirements, and stakeholder analysis.

SKILLS

- **Technologies:** *Proficient* JavaScript | *Intermediate* TypeScript, Python, Next.js, React.js, REST API, SQL *Beginner* C++ Java
- **Databases:** PostgreSQL Firebase MongoDB MySQL Git
